---

I need the file only for those with 2004 chest x-rays (n about 280). I am going to have Terry Schulz do a Cox regression comparing the result with the 1957-1980 versus the 1963-1980 exposure reconstruction. He needs the hire date (or time of first exposure) for one of the fields in the calculation program. I really only need a file with ID# (assuming it will be the same as the Excel files Eric sent me before) and hire date (month, year). Assuming ID#'s are the same, I can extract cumulative exposure, previous exposure to asbestos (y/n), and health outcome from the files I already have.

Bob, We have some questions. Do you want this for the 513 or only those with 2004 chest X-rays? What are you looking for re: the asbestos exposure, length of exposure or Y/N?

Thanks

Tim

Can you send me an Excel file that has ID #, Hire Date (month, year), and other exposure to asbestos (exposure\_asbestos)? I need the ID #'s to be the same as those in the file Eric sent with the exposure reconstruction from 1963-1980 (epa07082007).
